EDUCATION

Vivekanand Education Society's Institute of Technology, Chembur

CGPA: 9.51

BE in Information Technology

June 2024 – May 2028

OPEN SOURCE EXPERIENCE

- [46 merged pull requests](#) into MUI X, Jenkins, Medusa, AFFiNE, AsyncAPI, Accord Project, Sugar Labs and Frappe LMS, with 34 more currently open.
- MUI X ([mui/mui-x](#), 5.8k stars) – 26 merged PRs across the Scheduler, Pickers, Data Grid Premium and Charts packages: completed ARIA grid semantics for EventCalendar and EventTimeline, added Hijri and Jalaali calendar adapter support, hardened Excel export against formula injection.
- Jenkins ([jenkinsci/jenkins](#)) – 4 merged PRs to the core UI: fixed combobox and autocomplete selection, restored the build-log cancel button, and prevented parameter-dialog overflow.
- Accord Project – 5 merged PRs across template-playground, techdocs and template-archive, including re-adding the cicero-cli draft command on the template engine.

EXPERIENCE

GirlScript Summer of Code 2026 – Open Source Contributor, [Legend tier](#)

May 2026 – Present

- Selected for the Open Source Track of one of India's largest open-source programs; shipping maintainer-reviewed pull requests to large-scale projects.

Sports Reconnect Internship Programme – SDE Intern

Dec 2025 – Mar 2026

github.com/Anexus5919/player-profile-system | player-profile-system.vercel.app

- Cut manual athlete profile updates ~70% and improved media load efficiency by redesigning structured MongoDB schemas, a dynamic Next.js 16 frontend, and an optimized Cloudinary-based media pipeline for images and videos.

PROJECTS

SRE Incident Triage Environment – *OpenEnv AI × Meta Hackathon*

Apr 2026

github.com/Anexus5919/incident-triage-env

- Built a reinforcement-learning environment where AI agents act as on-call SREs, analyzing logs, system metrics and service-dependency graphs to diagnose root causes and remediate production incidents across graded scenarios; deployed on Hugging Face Spaces. Python, OpenEnv, FastAPI, Docker.

SWRMS – Smart Workforce & Route Management System – *BMC Chembur Ward, UN SDG 11*

Apr 2026

github.com/Anexus5919/SWRMS | swrms.vercel.app

- Built a workforce and route-management platform for BMC's Solid Waste Management (SWM) department, with geo-fenced attendance, face-recognition check-in, live route tracking and tamper-evident audit logs. Next.js 16, face-api.js, Leaflet, MongoDB, OSRM.

Fraud-Proof KYC Verification System – *Genesis 2026, QuestIT Cell*

Jan 2026 – Feb 2026

github.com/Anexus5919/fraud-proof-kyc | kyc-seven-kappa.vercel.app | kycadmin-two.vercel.app

- Engineered real-time facial authentication with spoof detection for fraud-resistant KYC by fusing MediaPipe landmarks with InsightFace ArcFace embeddings in FastAPI.

Secure Ephemeral Messaging Platform – *Personal Project*

Dec 2025 – Jan 2026

github.com/Anexus5919/realtime-chat | realtime-chat-ivory-rho.vercel.app

- Enforced a strict 2-participant room limit with zero unauthorized joins in a privacy-focused realtime chat by building a type-safe communication layer with Next.js 16, Elysia.js, Upstash Realtime and Eden Treaty.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java

Frontend: React, Next.js, Three.js, Tailwind CSS, Shadcn UI, GSAP, Vite

Backend: Node.js, Express.js, Bun, Elysia.js, FastAPI, REST APIs, WebSockets

Databases: MongoDB, PostgreSQL, pgvector, Redis (Upstash), Firebase

Tools: Git, Docker, Jenkins, Vercel, Cloudinary, Postman, Figma
